**FOI Ref: 03\_23-24**

**Requested Information**

Information on individuals who were identified to have a CACNA1C gene

**Response**

**FREEDOM OF INFORMATION ACT 2000**

Thank you for your request for information as detailed below, together with our reply.

Ref:	Question:	Response:
1	How many individuals were identified to have a CACNA1C gene change as a result of genetic testing during the year 2022 and during the year 2021?	Wiltshire Health and Care provides adult community services across Wiltshire. The CACNA1C gene is an arrhythmia condition which does not fall within the Wiltshire Health and Care Heart Failure pathway and we have not been able to identify any other services within Wiltshire Health and Care that conduct genetic testing.
2	How many individuals identified would indicate the classification of the findings with regard to number of individuals ie Pathogenic, likely pathogenic, variant of uncertain significance, likely benign and benign?	Wiltshire Health and Care are unable to offer a response to this question for the reason stated above.

If you have any further queries, please contact the Freedom of Information Team.
